U.S. AIR FORCE

# Joint Synthetic BattleSpace (JSB)

## Concept

An on-demand, integrated environmental and operational battlespace, able to selectively accommodate different functional applications at varying levels of detail using common components

-- JSB Visioning Workshop @ JFCOM

21-22 February 2001

Responsibility for JSB within the AF rests in AF/XOC

# Igniting JSB-AF Year 2000 Events

## VSWE VII - Col Phil

**Faye** JSB is actually a key enabler  
that...

- allows the warfighters to immerse in the problem
- allows the engineer to observe and be involved
- allows you to really

## Kestrel Phoenix - Lt Col. Gary

I believe JSB as it continues to evolve the direction we are going, instead of 10 TDY's in a year we might be able to do 8 TDY's and do 2 in the JSB environment

examine variations in performance capabilities

## JSB Ignition Event III - Maj. Charlie Dunn

"We had participation all the way from Incirlik Air Base... Additionally The Air Guard participated for the combat search and rescue event. In our Joint Air Operations Center, we actually fought the air battle"

## Desert Pivot - Lt Col "Boomer" Henry

- "Kestrel Phoenix, created a scenario that was used several months before we did our first Desert Pivot"
- "For about half the project we probably got double the training. All of the original players plus a lot more"

# Events in CY01

## ■ JSB Events

- **JSB-AF (Acquisition) Experiment (ESC/CX) - Fall 01**
  - Objective is to utilize heavily instrumented test environment of JCIET to validate synthetic environment representations
- **DESERT PIVOT (TACCSF)**
  - Theater Aerospace Command Control Simulation Facility (TACCSF) - sponsored interoperability & training
  - Repeatable quarterly training event
- **IITSEC 01 JSB (JFCOM and Services)**
  - JFCOM and Service supported demonstration
